Location: The University of Connecticut, Hartford Campus
(Constitution Plaza in Downtown Hartford)

Job Posting No: 2016663

Hours: 8:00am to 5:00pm

Salary: Salary will be commensurate on successful candidate's background and experience.

Closing Date: July 12, 2016

Duties and Responsibilities:

Develop an organizational structure and develop a near- and long-term organizational plan to build team subject matter experienced professionals. Develop a go to market strategy to define the business objectives and organizational structure to support the delivery of information management and advisory services. Hire, evaluate, and train assigned staff; represent the unit at grievance and pre-disciplinary hearings, fact-findings and labor related issues. Define, develop, and manage client strategic business and technology relationships around business enablement and advisory services. Build a knowledge base of emerging and evolving market trends and requirements around Big Data and Analytics to address an organization's business information requirements. Design and develop service offerings for business programs' information management enablement process. Lead exploratory data analysis to identify potential key insight variables for the design and development of advanced analytic models and indexes. Lead a team to define business cases and usage models to design advanced analytics solutions to include the business drivers and requirements, technology enabling architecture, programmatic and third party data sources, data models, data transformations, and dashboard and information visualizations. Create eminence and publish papers in industry journals and conduct presentations representing the organization in industry standards groups or forums. Define, develop, and manage vendor business ecosystem partners and define the go to market strategy to deploy solutions and service delivery. Develop and mentor others to share knowledge among the team.

Knowledge, Skills and Abilities:
Bachelor's or Master's degree in a related field from an accredited college/ university, with a minimum of 10 years of related experience and training. Flexibility to meet with stakeholders outside standard business hours as needed; some travel is required. Excellent communication, analytic and interpersonal skills including the ability to develop and mentor staff in a diverse community. Demonstrated experience in strategic management, design and implementation of IT/data.

Preferred Skills and Abilities:
Expert knowledge of current healthcare quality reporting programs and health information technology. Demonstrated ability to lead change through collaborative leadership that encourages teamwork and knowledge sharing. Must possess direct implementation of entity management systems like Enterprise master Person Index, Provider Registry.

Preferred Experience:
Experience working in a fast-paced project oriented healthcare environment. At least 20 years of experience in architecting solutions for Medicaid systems and managing information in such systems. Experience with information architecture, IT security, data warehousing, customer relationship management and/or project management.
